Gemma

DESIGNED BY DANIEL SZÖLLÖSI

Gemma is a mysterious light with a glowing crystal heart. It's the perfect combination of contemporary heritage, with its modern form featuring traditional glass cutting techniques and material. Gemma's allure hides a functional edge. A hidden LED spotlight makes the light an unexpected option for over a dining table or reading area. Available in crystal and frosted version, the crystal showcases the cut crystal inside while the frosted gives off an enigmatic glow. Gemma also features a diamond cut which beautifully refracts light and a wedge cut which creates a soft glow.
